

Pressure Protection Valves – Adjustable

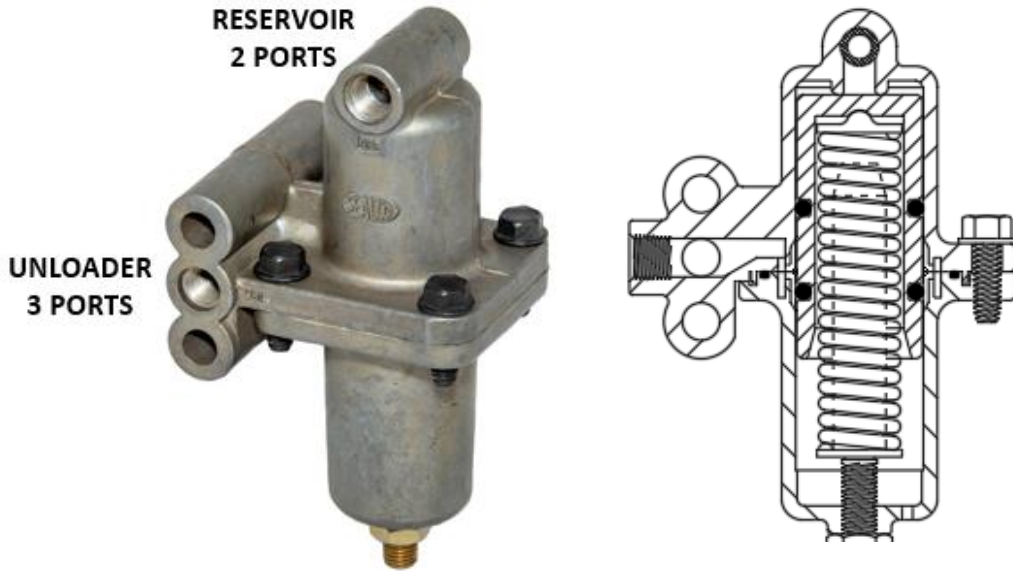

- Commonly used to protect & isolate the air supply in an air reservoir from any air operated component that is connected to it
- Valve opens at a factory set psi & allow air to flow through the Outlet port
- Valve closes at 5 psi below opening pressure indicated below
- Dimensions: Height 2.75" - Width 3.84" - Depth .81" • Approximate Weight: .53 lbs. (See [Weight Chart](#))
- [Air Piping Diagrams](#) – See Technical / Air Piping Diagrams, multiple diagrams are applicable
- [Competitive Part Interchange Guide](#)

PART NUMBER	PORT SIZES (NPT)		NOMINAL OPENING PRESSURE	ADJUSTABLE	
	INLET	OUTLET		MINIMUM	MAXIMUM
1300	1/4"	1/4"	60 psi	20 psi	70 psi
1300-05	1/4"	1/4"	10 psi	5 psi	20 psi
1300-35	1/4"	1/4"	35 psi	20 psi	70 psi

1300-80	1/4"	1/4"	80 psi	20 psi	85 psi
1300-80C	1/4"	1/4"	90 psi	20 psi	90 psi

Governor

- Monitors the reservoir air pressure & instructs the air compressor when to activate & deactivate
- Cut out pressure is factory set at 120 psi
- Cut in pressure is factory set at 100 psi but is adjustable from 90 psi to 135 psi
- Dimensions: Height 4.75" - Width 2.13" - Depth 3.09" • Approximate Weight: 1.02 lbs.

One-Way Check Valves

- Allows air to flow through valve in only one direction from inlet to outlet
- When loss of inlet air pressure occurs, prevents air from flowing back through valve
- Heavy duty metal construction with rubber to metal bonded shuttle for durability
- Dimensions: Height 3.25" - Width 1.50" - Depth 1.50" • Approximate Weight: .63 lbs. (See [Weight Chart](#))
- **Competitive Part Interchange**

Supply Line Filter

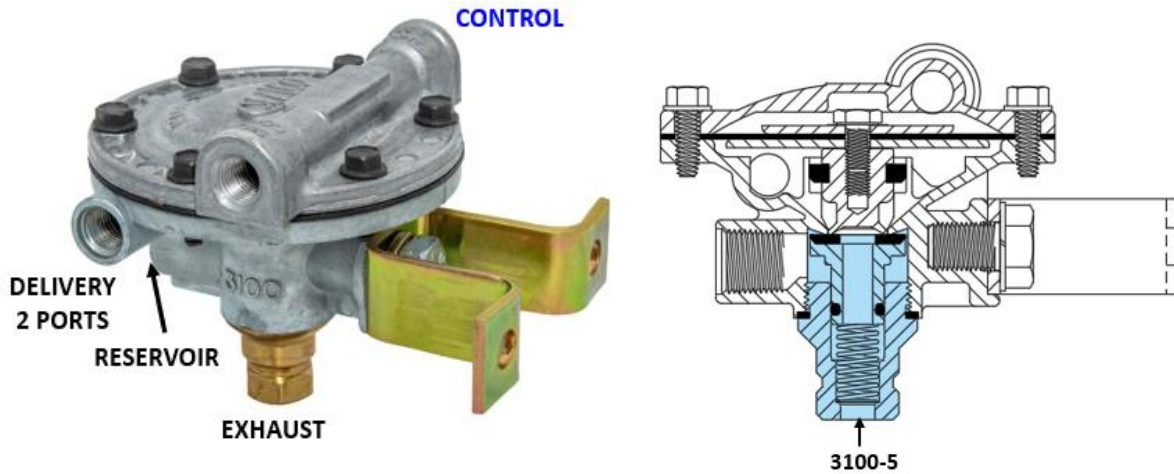

- Commonly used in the trailer supply line ahead of the spring brake control valve or emergency relay valve
- Reduces supply line & air reservoir contamination to extend the life of other air valves in the system
- The internal filter has 8 square inches of filter area & is removable for cleaning purposes during periodic maintenance schedules
- Supply Line Filter must only be mounted vertically to insure proper operation
- Dimensions: Height 4.25" - Width 1.53" - Depth 2.78" • Approximate Weight: .66 lbs.
- [Air Piping Diagrams](#) – See Technical / Air Piping Diagrams, multiple diagrams are applicable

Control Line Valve

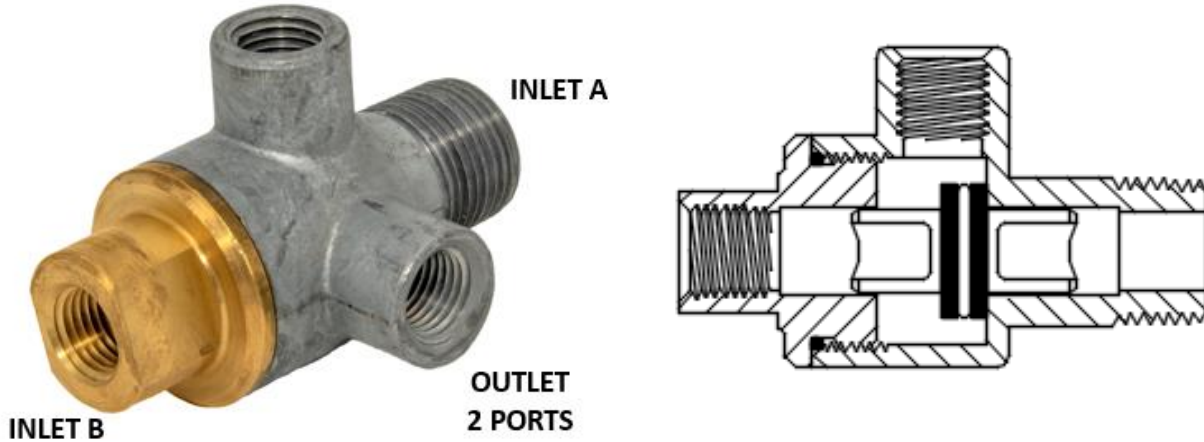

- Early version of Control Line valve used primarily on dollies
- Improves application & release of brakes on dollies & rearmost trailer axles in double & triple trailer combinations
- All unused ports must be plugged
- Can be replaced by the 110570 series or 110580 series of valves
- Dimensions: Height 3.94" - Width 4.38" - Length 5.44" • Approximate Weight: 2.41 lbs
- **PLUG UNIT ASSEMBLE 3100-5**

Hand Control Valve – Auto Reset

- Commonly used as dash valve inside tractor or truck for applications shown below
- Delivers air pressure only when the knob is held in by operator
- Once the knob is released, all air pressure in the delivery will be vented
- Dimensions: Height 1.30" - Width 1.00" - Length 3.87"
Approximate Weight: .27 lbs. (See [Weight Chart](#))

Ratio Quick Release Valve

- Combination Pressure holding & quick release valve
- Operates as a pressure holding valve until inlet pressure drops 2 to 2 ½ psi below output pressure before valve begins to exhaust
- Prevents unwanted loss of outlet pressure when inlet pressure varies during normal operation
- Heavy duty metal construction with rubber to metal bonded movable seat for durability
- In line mounting
- Dimensions: Height 1.94" - Width 1.56" - Depth 1.37" • Approximate Weight: .32 lbs.

Ratio Quick Release Valves

- Combination pressure holding & quick release valve
- Operates as a pressure holding valve until inlet pressure drop to 2 to 2 ½ psi below outlet pressure before valve begins to exhaust
- The ratio feature operates during the exhaust cycle. While building air from 0 psi, Inlet pressure is 1:1 with Outlet pressure. During exhaust cycle, Inlet pressure must decrease by 2.5 times before Outlet pressure exhausts.
- Prevents unwanted loss of outlet pressure when inlet pressure varies during normal operation
- Heavy duty metal construction with rubber to metal bonded moveable seat for durability
- 2 hole bracket for frame or crossmember mounting
- Dimensions: Height 2.25" - Width 2.25" - Depth 2.00" • Approximate Weight: .60 lbs. (See [Weight Chart](#))

Air Bag Control Valve – Manual Operation

- Commonly used to control the inflation & deflation of air suspension bags
- Often used with 110587 Pilot Valve to deflate air bags
- Allows for movement of the trailer back to the dock without re-inflating the air bags
- Operates with all air suspension systems
- Pull to manually exhaust air from the air bags & push to refill that air bags from the reservoir
- Includes 110524 Exhaust Cap
- Dimensions: Height 4.78" - Width 2.56" - Depth 1.75" • Approximate Weight: .87 lbs.

PLATE 8179

Pressure Relief Valves

- Pressure Relief Valves are designed to open at a designated pressure thereby relieving air pressure buildup
- Part numbers 110127 & 110627 are commonly used on truck, tractor or bus air brake system reservoirs in the event that the governor fails to cut-out at the designated air pressure & are normally mounted on the reservoir
- Dimensions: Height .80" - Width .71" - Depth .71" • Approximate Weight: .12 lbs. (See [Weight Chart](#))
- [Competitive Part Interchange](#)

PART NUMBER	PORT SIZE (NPT)	PRESSURE SETTING
110127	1/4"	Factor set at 150 psi
110399	1/4"	Factor set at 55 psi
110601	1/4"	Factor set at 95 psi

Combination Valve

- Commonly used on air starter systems
- Combination Valves act as a one-way check valve & adjustable pressure relief valve
- Factory pressure set at 150 to 160 psi
- Dimensions: Height 2.87" - Width 1.43" - Depth 2.56" • Approximate Weight: .64 lbs.

Service Relay Valves (4 Delivery Ports)

- The ratio feature is considered a benefit in hard stop situations & refers to the relationship between the control air pressure to the valve & the delivered air pressure from the valve to the service brake chambers
- During normal stopping a 1:1 ratio exists between the control & delivered air pressures. In a hard stop the ratio momentarily changes to 1:1.5 until valve lap off occurs & the 1:1 ratio is restored. This change takes place in less than 1/100 of a second
- Do not use ratio feature valves on converter dollies, trailer turnable axles or lift axles
- Dimensions: Height 4.75" - Width 4.72" - Depth 5.63" • Approximate Weight: 3.92 lbs. (See [Weight Chart](#))
- **PLUG UNIT ASSEMBLIES 110143 & 110583**

Spring Brake Control Valves – Protected Reservoir System

- The Protected Reservoir System requires 2 or 3 air reservoirs supplied by the reservoir ports of the valve which protects one or the other air reservoir(s) in the case of a sudden loss of air pressure.
- Complies with all regulations of FMVSS 121 & CMVSS 121
- Dimensions: Height 4.78" - Width 3.75" - Depth 4.56" • Approximate Weight: 3.82 lbs. (See [Weight Chart](#))

Bypass Check Valves

- Commonly used as slow release Check Valve for applications such as lowering air control of the drawbar
- When inlet pressure drops, outlet pressure slowly drops through indicated orifice below
- Bypass Check Valves will not replace standard Check Valves
- Heavy duty metal construction with rubber to metal bonded shuttle for durability
- Dimensions: Height 2.37" – Diameter 1.25" • Approximate Weight: .30 lbs. (See [Weight Chart](#))
- [Air Piping Diagrams](#) – See Technical / Air Piping Diagrams, multiple diagrams are applicable

Relay Emergency Valves – Charging (4 Delivery Ports)

- Relay Emergency valves with a ratio feature are considered beneficial when harder than normal stops are required. During hard stops, the ratio feature activates for less than 1/100 of a second so that the valve delivers air quicker than normal to the brake chambers. During normal stops, the ratio feature does not operate.
- Do not use ratio feature valves on converter dollies, trailer turn/steer axles or lift axles
- Dimensions: Height 5.28" - Width 4.78" - Depth 5.91" • Approximate Weight: 5.44 lbs. (See [Weight Chart](#))

Emergency Brake Pressure Protection Valve

- Commonly used to comply with 70 psi supply line retention rule on converter dollies, turnable axles & air lift axles with service brake chambers
- Used in conjunction with 110338 Relay Emergency Valve or 110376 Emergency Control which allows full reservoir pressure to be applied to Relay Valves to apply parking brakes
- Back flow feature of valve allows for use with pintle chamber to comply with Canadian National Safety Code
- Valve should be installed with vent hole facing downward
- Heavy duty metal construction with rubber to metal bonded moveable seat for durability
- Does not replace traditional Pressure Protection Valves such as 140XXX series
- Complies with all regulations of FMVSS 121 & CMVSS 121
- Dimensions: Height 2.31" - Width 1.18" – Depth 2.25" • Approximate Weight: .50 lbs. (See [Weight Chart](#))
- [Air Piping Diagrams](#) – See Technical / Air Piping Diagrams, multiple diagrams are applicable

110257	3/8"	3/8"	70 psi

Pressure Protection Valves

- Commonly used to protect air brake reservoirs from being depleted by the failure of other air accessory items
- Valve opens at approximately 5 psi above nominal closing pressure & allows air to flow through to the Outlet Port
- Valve closes at the nominal psi indicated below
- Valve should be installed with the vent hole facing downward
- Does not interchange with the 140XXX series of Pressure Protection Valves
- Dimensions: Height 2.00" - Width 1.18" - Depth 2.25" • Approximate Weight: .50 lbs. (See [Weight Chart](#))
- [Competitive Part Interchange](#)

Duplex Test Gauge

- The Duplex Test Gauge is actually two separate air pressure gauges in one housing
- Each color coded hose connects to a separate indicator needle to show the air pressure being recorded
- The indicator needles use a common dial to allow for easy reading & comparison
- This durable field instrument can be used to check input & output air pressures at various points in the air system
- This tool can identify air line restrictions, air system imbalances, insufficient air supply pressures, trapped air & leaks
- Checking two separate points in an air brake system against each other will indicate both the amounts of pressure delivered to the test points & their relative time of arrival
- This makes the Duplex Test Gauge an invaluable air system troubleshooting device
- A diagnostic manual is included with the Duplex Test Gauge
- The gauge dial is 3.5" in diameter
- Each color coded hose is 35' long to reach connections on the semi-truck &/or trailer combinations

Spring Brake Control Valves – Spring Brake Priority

- Spring brake priority systems were approved with the FMVSS 121 rule in October 1992 & are the most common systems on tandem & tridem trailers with spring brake chambers. The valve immediately provides tractor supply air to release the spring brakes & the internal Pressure Protection Valve opens to also fill the air reservoir at approximately 80 psi.

- 4 horizontal delivery ports available, 2 forward facing & 2 side facing
- Designed for use with 2,800 cu in jumbo &/or 1,400 cu in air reservoirs
- Complies with all regulations of FMVSS 121 & CMVSS 121
- Dimensions: Height 3.05" - Width 2.56" - Length 3.71" • Weight: 1.36 lbs.
- **Mounting Hardware** – See Air Valves & Related Products / Mounting Hardware
- **Air Piping Diagrams** – See Technical / Air Piping Diagrams, multiple diagrams are applicable

Air Bag Control Valve – Automatic Operation

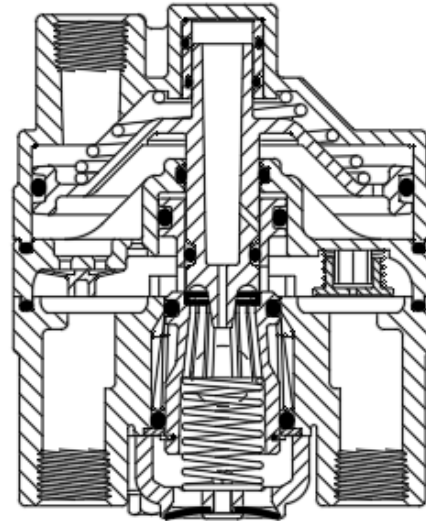

- Commonly used to control the inflation & deflation of suspension air bags
- Normally used with 110587 Pilot Valve
- Operates with all air suspension systems but not recommended for suspensions that exhibit dock walk
- Manually operated to exhaust air from the air ride springs
- Automatically resets to fill the air springs when the trailer parking brakes are released
- Dimensions: Height 4.78" - Width 2.56" - Length 1.75" • Approximate Weight: .87 lbs.
- **13-A KNOB INCLUDED**

Control Line Valves – Dollies & Turnable Axles

- Primarily used on dollies & turnable axles on full & transfer trailers & on multi-axle semi-trailers with lift/steer axles
- The delivery port labeled Dolly Port of this Control Line Valve is plumbed to the Relay Emergency Valve, Relay Valve or ABS ECU to control the service brakes
- Provides a balanced control line signal for uniform braking of multi-axle combination vehicles
- Prevents premature braking of the turnable axle(s) in combination vehicles for maximum lateral stability while stopping
- Improves the release of service brakes in the tractor/trailer combination eliminating trailer brake drag complaints
- Complies with all regulations of FMVSS 121 & CMVSS 121
- Dimensions: Height 5.88" - Width 4.00" - Depth 3.84" • Approximate Weight: 3.46 lbs. (See [Weight Chart](#))

Control Line Valves

- Primarily used on trailers designed to tow another trailer, long wheel base sliding tandems & specialty trailers with multiple axles
- Provides a balanced control line signal for uniform braking of multi-axle combination vehicles
- Improves application timing of service brakes in rearmost axles of long wheel base tractor/trailer combinations
- Improves the release of service brakes in the tractor/trailer combination eliminating trailer brake drag complaints
- Complies with all regulations of FMVSS 121 & CMVSS 121
- Dimensions: Height 5.87" - Width 3.84" - Depth 4.51" • Approximate Weight: 3.44 lbs. (See [Weight Chart](#))

Air Pilot Valve (Normally Closed)

- Pilot air pressure directly from the trailer supply line, or a manual control valve, opens the supply port of the Pilot Valve & allows the supply air pressure to be delivered to air bags, chambers or air cylinders
- Discharging the pilot air closes the Pilot Valve which blocks the delivery of air from the supply air pressure & exhausts the air bags, chambers or air cylinders
- The exhaust port has the 110524 exhaust cap attached
- Dimensions: Height 2.94" - Width 1.88" - Length 4.67" • Approximate Weight: 1.17 lbs.

Fast Fill Air Suspension Valves

- Commonly used to speed the inflation of air suspension bags
- Uses air pressure from the air reservoir in addition to air from the height control system
- Operates momentarily while inflating the air bags & returns control to the Height Control Valve to fill & exhaust the air bags
- Valve does not exhaust, air bags will exhaust through the Height Control Valve
- Totally automatic operation
- Available as frame mount (110595) or air reservoir & nipple mount (110597)
- Dimensions: Height 4.18" - Width 4.31" - Depth 4.25" • Approximate Weight: 3.06 lbs. (See [Weight Chart](#))
- **Mounting Hardware** – See Air Valves & Related Products / Mounting Hardware
- **Air Piping Diagrams** – See Technical / Air Piping Diagrams, multiple diagrams are applicable

* 110595 has 3 delivery ports, 110597 has 2 delivery ports

PART NUMBER	PORT SIZES (NPT)				COMMENTS
	CONTROL	RESERVOIR	DELIVERY (2)	DELIVERY *	
110595	3/8"	1/2" (2)	3/8"	1/2"	Frame mount - includes bracket
110597	3/8"	1/2" (1)	3/8"	N/A	Nipple mount to air reservoir

Automatic Pilot Valve

- Commonly used for the operation of lift axle systems in conjunction with a 110587 Air Pilot Valve & 110591 Lift Axle Control Valve or a 523060 Air Piloted 5/2 Valve
- This application works well with any trailer that fully exhausts it's air ride bags when unloading
- When approximately 80 psi is applied to Supply port, the valve opens & delivers the Supply pressure to the Delivery port
- When Delivery pressure is lost, the valve will hold approximately 60 psi in the Supply port
- Dimensions: Height 2.31" - Width 1.88" - Length 4.42" • Approximate Weight: 1.22 lbs.

Air Piping Diagram – See Technical / Air Piping Diagrams

Automatic Pilot Valve – Adjustable

- Commonly used for the operation of lift axle systems in conjunction with a 110587 Air Pilot Valve & 110591 Lift Axle Control Valve or a 523060 Air Piloted 5/2 Valve
- This application works well with any trailer that fully exhausts it's air ride bags when unloading
- When Supply pressure reaches approximately 50 psi, the valve will open & deliver Supply pressure to the Delivery port
- The external adjustment allows for a varying opening pressure from 50 psi to 80 psi
- When the Delivery pressure is lost, the valve will hold approximately 15 psi less than the opening pressure in the Supply port
- Dimensions: Height 2.31" - Width 1.88" - Length 4.42" • Approximate Weight: 1.22 lbs.
- **Air Piping Diagrams** – See Technical / Air Piping Diagrams, multiple diagrams are applicable

Relay Valve – Severe Service

- Used as a Relay Valve for severe cycling applications
- Can be used with Solenoid Valve for harsh cycling service environments
- Improves the release of service brakes in the tractor/trailer combination eliminating trailer brake drag complaints
- Dimensions: Height 3.51" - Width 2.88" - Depth 4.06" • Approximate Weight: 2.16 lbs.
- [Air Piping Diagrams](#) – See Technical / Air Piping Diagrams, multiple diagrams are applicable

Spring Brake Control Valves – Service Reservoir Priority

CONTROL

- Service reservoir priority systems simultaneously provide tractor supply air to fill the reservoir(s) & release the spring brakes when trailer reservoir(s) are empty
- When trailer air reservoir is full, valve delivers air to spring brake chambers immediately due to valves relay feature
- 4 delivery ports available, 2 downward facing & 2 side facing
- Designed for use with 2,800 cu in jumbo &/or 1,400 cu in air reservoirs
- Complies with all regulations of FMVSS 121 & CMVSS 121
- Dimensions: Height 3.51" - Width 2.88" - Depth 4.05" • Approximate Weight: 2.16 lbs.
- **Mounting Hardware** – See Air Valves & Related Products / Mounting Hardware
- **Air Piping Diagrams** – See Technical / Air Piping Diagrams, multiple diagrams are applicable
- **PLUG UNIT ASSEMBLY 110515** for pressure protection portion repairs, yellow shaded area
- **PLUG UNIT ASSEMBLY 110705** for moveable seat portion repairs, blue shaded area

Hand Control Valve – Auto Reset

- Commonly used for locking mechanisms such as sliding fifth wheel plates
- Delivers air pressure only when the knob is held in by the operator
- Once the knob is released, all pressure in the delivery will be vented
- Dimensions: Height 5.50" - Width 2.43" - Depth 2.00" • Approximate Weight: .78 lbs. (See [Weight Chart](#))
- [Air Piping Diagrams](#) – See Technical / Air Piping Diagrams, multiple diagrams are applicable

Spring Brake Control Valves – Spring Brake Priority

- Spring brake priority systems were approved with the FMVSS 121 rule in October 1992 & are the most common systems on tandem & tridem trailers with spring brake chambers. The valve immediately provides tractor supply air to release the spring brakes & the internal Pressure Protection Valve opens to also fill the air reservoir at approximately 80 psi.

- This valve also releases the spring brakes faster when the trailer air reservoirs are full because it uses both tractor supply air & trailer reservoir air pressure due to the valves relay feature

- 4 delivery ports available, 2 downward facing & 2 side facing
- Designed for use with 2,800 cu in jumbo &/or 1,400 cu in air reservoirs
- Complies with all regulations of FMVSS 121 & CMVSS 121
- Dimensions: Height 3.51" - Width 2.88" - Depth 4.05" • Weight: 2.13 lbs.

- **Mounting Hardware** – See Air Valves & Related Products / Mounting Hardware
- **Air Piping Diagrams** – See Technical / Air Piping Diagrams, multiple diagrams are applicable

110800	3/8"	3/8"	1/2"	3/8"

Service Relay Valves (6 Delivery Ports)

- The ratio feature is considered a benefit in hard stop situations & refers to the relationship between the control air pressure to the valve & the delivered air pressure from the valve to the service brake chambers
- During normal stopping a 1:1 ratio exists between the control & delivered air pressures. In a hard stop the ratio momentarily changes 1:1.5 until valve lap off occurs & the 1:1 ratio is restored. This change takes place in less than 1/100 of a second
- Do not use ratio feature valves on converter dollies, trailer turnable axles or lift axles
- Dimensions: Height 4.75" - Width 4.72" - Depth 5.63" • Approximate Weight: 4.35 lbs. (See [Weight Chart](#))
- **PLUG UNIT ASSEMBLIES 110143**
- **MINOR REPAIR KIT 110005** • **MAJOR REPAIR KIT 110118** • **AUXILIARY SUPPLY PORT REPAIR KIT 110673**
- **Air Piping Diagrams** – See Technical / Air Piping Diagrams, multiple diagrams are applicable
- **Competitive Part Interchange Guide**

PART NUMBER	PORT SIZES (NPT)				RATIO FEATURE	NOMINAL CRACK PRESSURE

116600P	Capped	3/8"	3/4"	3/8"	Yes	4.5 psi

Relay Emergency Valves – Charging (6 Delivery Ports)

• Relay Emergency valves with a ratio feature are considered beneficial when harder than normal stops are required. During hard stops, the ratio feature activates for less than 1/100 of a second so that the valve delivers air quicker than normal to the brake chambers. During normal stops, the ratio feature does not operate.

• Do not use ratio feature valves on converter dollies, trailer turnable axles or lift axles

• Dimensions: Height 5.28" - Width 4.78" - Depth 5.91" • Approximate Weight: 7.50 lbs. (See [Weight Chart](#))

• [PLUG UNIT ASSEMBLY 110143](#) • [MAJOR REPAIR KIT 110201](#)

Suspension Exhaust Valve

- Normally placed in line in between the Height Control Valve & the air springs
- Allows high speed exhausting of air suspensions, two delivery ports for faster release
- Built in pilot port can be used to reset the valve to the closed position when pressurized. When the pilot port is connected to the supply line, the valve will auto reset & fill the air ride springs when the parking brakes are released

8179 NAMEPLATE

- The valve includes a special breather for the pilot port that should be used when not connected to the supply line
- Dimensions: Height 4.75" - Width 2.00" - Depth 1.00" • Approximate Weight: .46 lbs. (See [Weight Chart](#))
- [Air Piping Diagrams](#) – See Technical / Air Piping Diagrams, multiple diagrams are applicable

Dual Line Valve

- Commonly used on air braked vehicles designed to tow other air braked vehicles
- Pushing the knob in cuts off air flow to the rear gladhands while pulling the knob out allows air to flow to the rear gladhands & the air braked vehicle being towed preventing false charging
- The optional pintle port allows the air flow to the pintle hook to be controlled as well
- Dimensions: Height 2.50" - Width 1.75" - Length 7.00" • Approximate Weight: 1.19 lbs.
- **Mounting Hardware** – See Air Valves & Related Products / Mounting Hardware

Load Sensing Axle System

- Commonly used on air braked trailers to deploy lift axles with air suspension when trailer is loaded
- Prevents the overloading of the trailer's fixed down axles if operator neglects to lower the lift axle(s)
- The system monitors the load by sensing the pressure in the trailer's air suspension
- Lift axle(s) deployment range of trigger pressure from 25 to 75 psi
- Dimensions: Height 3.00" - Width 1.25" - Depth 10.08" • Approximate Weight: 2.97 lbs. (See [Weight Chart](#))
- [Air Piping Diagrams](#) – See Technical / Air Piping Diagrams, multiple diagrams are applicable

Pressure Protection Valves

- Commonly used to protect & isolate air brake system reservoirs, & the auxiliary air devices that connect to them for their source of air, in the event that one or the other fails
- Valve closes at the nominal psi indicated below & opens at approximately 10 psi more than closing pressure
- Valves include an internal filter & positive one-way check valve
- Valve should be installed with vent facing downwards
- Complies with all regulations of FMVSS 121 & CMVSS 121
- Dimensions: Height 2.52" - Width 1.13" - Depth 2.08" • Approximate Weight: .41 lbs. (see [Weight Chart](#))
- [Air Piping Diagrams](#) – See Technical / Air Piping Diagrams, multiple diagrams are applicable

Air Bag Control Valves

- Commonly used to control the inflation & deflation of air suspension bags

- Manual mode allow for movement of the trailer without re-inflating the air bags by inserting the 0361 Breather Plug into the Pilot Port (do not use sealant on the Breather Plug – Pilot Port must never be plugged)

- Auto Reset mode resets valve to fill air bags when trailer parking brakes are released by not using the Breather Plug & connecting the supply line to the Pilot Port

- Dimensions: Height 4.25" - Width 2.62" - Depth 1.62" • Approximate Weight: 1.05 lbs. (See [Weight Chart](#))

- [Air Piping Diagrams](#) – See Technical / Air Piping Diagrams, multiple diagrams are applicable

- [Competitive Part Interchange](#)

PART NUMBER	PORT SIZES (NPT)			KNOB	NAME PLATE	COMMENT
	INLET	OUTLET	PILOT			
996555	1/4"	1/4"	1/4"	0190	8179	Without Boot
996550	1/4"	1/4"	1/4"	0190	8179	With Boot

Relay Emergency Valves – Pre FMVSS 121

1000-5A Cartridge

- Used in air brake systems prior to the implementation of the FMVSS 121 rule & the mandate for mechanically held brakes resulting in spring brake chambers
- Designed to be used with service brake chambers only
- See Sealco Charging Relay Emergency valves for versions of this valve used since 1975
- Dimensions: Height 5.31" - Width 7.19" - Depth 7.000"
Approximate Weight: 5.60 lbs.
- **Mounting Hardware** – See Air Valves & Related Products / Mounting Hardware
- **Air Piping Diagrams** – See Technical / Air Piping Diagrams, multiple diagrams are applicable

PART NUMBER	PORT SIZES (NPT)				NOMINAL CRACK PRESSURE
	SUPPLY	CONTROL (2)	RESERVOIR	DELIVERY (4)	
A1000S	1/4"	1/4"	1/2"	1/4"	1.5 PSI

Push/Pull Valves – Automatic Shut Off (Single Hole Mounting)

- Commonly used as dash valve inside tractor or truck
- Automatic shut-off when inlet pressure drops to 30 ± 5 psi
- Single hole mounting

KNOB 13Y (YELLOW)

KNOB 13R (RED)

- Dimensions: Height 5.20" - Width 2.45" - Length 2.18" • Approximate Weight: .83 lbs. (See [Weight Chart](#))

• **REPAIR KIT A256-5**

- **Air Piping Diagrams** – See Technical / Air Piping Diagrams, multiple diagrams are applicable
